

Ishan Gupta

Full Stack Developer

Noida, India · ishangupta3121@gmail.com · LinkedIn · GitHub · Portfolio

Profile Summary

- Full Stack Developer experienced in building scalable web and mobile applications.
- Strong skills in React, Next.js, Tailwind CSS, JavaScript/TypeScript, Node.js, React Native.
- Adept in UI/UX design with Figma; capable of leading branding-oriented and user-focused development projects from concept to deployment.

Experience

Edwance.ai - Front End Developer Intern

July 2025 – Present

- Spearheaded the end-to-end design and development of Edwance.ai's landing page and dashboard.
- Contributed to the product's growth from concept to a fully scaled service with production-ready UI.
- Worked closely with the backend team to ensure seamless API integrations and responsive layouts.

Tangle - Full Stack App Developer (Freelance)

July 2025 – Present

- Leading the development of Tangle's MVP for a funded startup, from initial concept to cross-platform app.
- Designed and implemented both frontend and backend architectures for scalability and performance.
- Delivered a visually engaging and user-friendly interface built for rapid iteration and feature expansion.

Gennext IT - Full Stack Developer Intern

April 2025 – July 2025

- Architected and developed scalable web applications with optimized performance.
- Worked across frontend and backend to deliver production-grade solutions using modern tech stack.

Insyd - Founder and App Developer

March 2025 – June 2025

- Designed and developed the Insyd app from concept to launch using React Native and Figma.
- Built backend integrations, authentication flows, and real-time event management features.
- Oversaw end-to-end deployment with a focus on smooth UX and pixel-perfect design.

Res&Cafe - UI/UX Designer (Freelance)

Oct 2024 – Jan 2025

- Designed a modern and intuitive restaurant menu app interface focused on smooth user navigation and visual clarity.
- Created wireframes, mockups, and high-fidelity designs in Figma tailored for mobile and tablet experiences.
- Focused on clean aesthetics, responsiveness, and minimalistic user journey for food browsing and ordering.

Projects

Insyd - Nightlife Discovery App

- Built a fully responsive mobile application for sending and managing clubbing invites.
- Developed in React Native and Figma from scratch; focused on sleek transitions, flow, and usability.
- Integrated backend and frontend features for real-time interaction and event creation.
- Tech Stack : React Native, TypeScript, Nativewind, Express.js, PostgreSQL

Tangle - Social MVP App

- Leading the development of Tangle's MVP for a funded startup, covering frontend, backend, and deployment.
- Designed and implemented scalable architecture with real-time features and responsive UI.
- Delivered a polished cross-platform app experience using modern frameworks.
- Tech Stack : React Native, TypeScript, Nativewind, Express.js, PostgreSQL

Cradle - E-Commerce Platform

- Designed and developed a full-stack e-commerce website for athletic fashion.
- Implemented product pages, cart, checkout, admin tools with branding-first visual style.
- Tech Stack : React.js, JavaScript, CSS

Technical Skills

Area of Expertise: React, Next.js, TypeScript, JavaScript, Tailwind CSS, Node.js, Python, PostgreSQL, MongoDB, Git, Figma, React Native

Other Skills & Tech: AWS, Vercel, Firebase, Prisma, Express, Vue.js
