SUMMARY

Aspiring and passionate web developer and BCA student seeking a challenging role to apply technical skills, learn new technologies, and contribute to innovative projects. Proficient in the **MERN stack (MongoDB, Express.js, React, Node.js)** with proven experience developing full-stack applications and responsive user interfaces. Eager to collaborate and grow in a dynamic tech environment.

EDUCATION

Bachelor of Computer Applications (BCA)

Jaypee Institute Of Information Technology,
Noida

Expected Graduation: 2026

TECHNICAL SKILLS

Frontend	JavaScript, React, Redux, HTML, CSS, Tailwind CSS
Backend	Node.js, Express.js
Database	MongoDB, MySQL
Languages	Java, Python
Soft/Other	Vercel, Video Editing, Cinematography

PROJECTS

[Vastora \(Full-Stack Video Streaming Platform\)](#)

MERN Stack (React, Node.js, Express, MongoDB)

June 2025 – Sep 2025

- Developed a full-stack video streaming platform inspired by YouTube, showcasing proficiency in the **MERN stack**.
- Built the backend with **Node.js/Express** for secure **authentication** and utilized **MongoDB** with advanced aggregation pipelines for data handling.
- Implemented a responsive, modern **React** frontend and deployed the application live on Vercel.

[WeatherNow \(Real-Time Weather Application\)](#)

React.js, Public API Integration

April 2025

- Created a sleek and responsive weather application using **React** to fetch real-time data from a public weather API.
- Allows global city search and instantly displays updated conditions (temperature, humidity, wind speed) with dynamic styling and icon adaptation.

[Spotify Clone](#)

HTML, CSS, JavaScript

October 2023

- Developed a responsive clone of the Spotify web interface to strengthen skills in **HTML and CSS**.
